Tuan Sang Tran
Griffith University

Dr Tuan Sang Tran is currently a Research Fellow at Queensland Micro- and Nanotechnology Centre, Griffith University. His research focuses on designing the interactions between nanomaterials to enable applications in flexible sensors, high-performance electronics, and renewable energy.

Dr Tran graduated from RMIT University with a Ph.D. in Engineering in 2021. After that, he worked as a Postdoctoral Fellow at RMIT from 2021 to 2022, before joining UNSW from 2023 to 2024. Recently, Dr Tran was awarded the GU (Vice-Chancellor's) Postdoctoral Fellowship, and he moved to Griffith University in early 2024 to commence his research on advancing flexible sensors with 2D materials.
